

**Tim Fawcett**

Vice President, Director,
Cybersecurity Consulting at Guernsey

Tim Fawcett is a Vice President and the Director of Cybersecurity Consulting at Guernsey. Founded in 1928, Guernsey is a comprehensive professional consulting firm offering

architecture, engineering, and consulting services across the globe. Guernsey's cybersecurity practice assists clients in securing their environments with services such as Governance, Risk and Compliance, internal controls review, risk assessments, OT/ICS/SCADA security evaluations, critical infrastructure design and protection, penetration testing, digital forensics, and physical security. Guernsey was authorized to be the eighth Authorized Third-party Assessor Organization (C3PAO) in the county and has had that designation for over three years. Guernsey assists clients with CMMC preparation and assessment services.

Tim is a Marine Corps veteran with over 25 years of information assurance experience working with both public and private, small to mid-sized companies, in a range of industries, including critical infrastructure and the Defense Industrial Base. Tim was selected and trained to be one of only a handful of DoD's Cybersecurity Maturity Model Certification provisional assessors and is currently a CMMC CCA and an authorized Lead assessor. Tim is also a Certified Information Systems Security Professional and a Certified SCADA Security Architect.
