

Matthew McQueen

NSWC CRANE

Matthew McQueen serves as Chief Engineer for the Printed Circuit Technology Branch at Naval Surface Warfare Center Crane Division in Indiana. Through this role he advises on projects ranging from fabrication and assembly of circuit cards to the evaluation of electronic systems and requirements. Matt has been involved with the Executive Agent for Printed Circuits and Interconnect Technology for many years providing subject matter expertise for mission critical opportunities. Since 2006, Matt served as part of the qualification team for the electronics package of the Trident Strategic Systems Program, overseeing printed circuit board supplier and materials testing. He is actively involved with the industry standard bodies for printed circuit boards and assemblies, helping develop acceptability and testing requirements for bare circuit boards. Matt received a Bachelor of Science in Mechanical Engineering from Michigan Technological University in Houghton, Michigan.
